**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to  
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I live in a small community, outside the city of Davis, California. We do not have access to any of the larger ISP's (AT&T, Comcast cable, etc.). Fortunately, a small ISP, Omsoft, which is part of the Davis Community Network, has been kind enough to offer us internet service through an extended wi-fi network, or we would be totally left out of the many wonders made available through the internet; Omsoft has been providing us with reasonably priced access to the internet for over ten years and is working with our small community to provide a hybrid system incorporating fiber-optic links with enhanced over the air transmission, so that we will be able to have reasonably rapid access to the World Wide Web. That's a big thing for our community, as well as for thousands of small rural communities throughout the country who are serviced by small ISP's like Omsoft.

Thank you for your consideration,

Thomas Hahn
